

**SPECIFICATION AMENDMENTS:**

Please replace the paragraph on page 1, lines 4 through 6, with the following amended paragraph:

--The invention relates to a server rack ~~adopted~~ adapted for use on computer servers, and particularly to a server rack that may be opened or closed easily without using hand tools for replacing electronic devices in the server to facilitate repairs and maintenance.--

Please replace the paragraphs on page 3, lines 3 through 13, with the following amended paragraphs:

--The base dock 10 has an upper beam 11 which bridges two opposite ends thereof. The upper beam 11 includes ~~a latch structure 111~~, second screw holes 112 and an opening 113.

~~The~~ A latch structure 111 is attached to the upper beam 11, and is an elastic slice and has first screw holes 1113 on one end corresponding to the second screw holes 112 to receive fastening elements to fasten the latch ~~element~~ structure 111 to the upper beam 11. The latch structure 111 includes a latch section 1111 and a bucking section 1112. The latch section 1111 may be latched ~~on~~ to the upper lid 20 to couple the upper lid 20 on the base dock 10. The bucking section 1112 corresponds to the opening 113 and may be driven by the upper lid 20 so that the latch structure 111 is turned relative to the upper beam 11 to release the coupling of the base dock 10 and the upper lid 20.--
